Christian Science breaks the grip of matter

Many people have been healed of apparently hopeless troubles and diseases through prayer in Christian Science.

They have found a better way of life. They have gained, or regained, peace and confidence.

How anyone can learn to pray understandingly, effectively, is fully explained in the first chapter of Science and Health with Key to the Scriptures by Mary Baker Eddy. Such prayer is the spiritual understanding of God and of man in His "image and likeness," as the Bible teaches.

Science and Health may be read or borrowed at any Christian Science Reading Room. Send \$2 for a copy postpaid.

County Fair Feeding at Public Trough; Should Pay Own Way

By CHARLES E. CHAPEL
Assemblyman, 46th District
Thirty-two fairs of one kind or another are held within a one-hundred mile radius of Sacramento. An examination of the audit of California fairs for the year 1957 shows that all of them received subsidies from the State, beginning at \$65,000 and going up, all of which came from race track revenues.

In the Los Angeles area, there are four fairs, three of which are county fairs and the fourth is the Great Western Livestock Exhibit. Normally, people think of the fair at Pomona, but in addition to the fair there, there is the 50th Agricultural District's Fair held in Antelope Valley, at Lancaster; and the Devonshire Fair held in the San Fernando Valley by the 51st Agricultural District. All rank as county fairs and each draws the \$65,000 minimum subsidy.

THE GREAT Western Livestock Show held in Los Angeles is sponsored by the 48th Agricultural District. The 1957 audit reveals that it received a subsidy of \$125,000 for that year. This is shocking when it is remembered that the big livestock shows in Kansas City, Chicago, and other livestock centers are conducted by private enterprise and operated at a profit for many years.

The Chicago Livestock Show has built out of its profits the largest exposition and confer-

ence hall in the United States, an amphitheater with 500,000 feet of floor space, large enough for presidential conventions in the past.

THE UNION Stockyard Co., which owns the big Chicago livestock amphitheater pays property taxes to the city of Chicago, Cook County, and to the State of Illinois.

In alarming contrast, the Great Western Livestock Show of Los Angeles pays no taxes to the City of Los Angeles, Los Angeles County, or the State of California. Furthermore, during the 1957 calendar year, the Great Western Livestock Show took in \$12,272 but its payroll for executives and administrators was \$20,303.

In other words, it required \$20,303 in salaries and wages to produce an income of \$12,272, although the plant is carried on the account books as worth \$695,100.

WHEN THE Great Western Livestock Show is audited further, it is found that the actual intake was \$7421. The other \$4851 income was from rentals of the exhibit grounds for purposes other than the livestock stock. The total cost of operation for 1957 was \$101,596.

Going back again to basic principles of bookkeeping, a plant worth \$600,000 and \$100,000 in cash brought in only \$12,272. If a private business ran in this manner, it would be bankrupt.

THE LOSS was made up by the taxpayers, directly with the \$125,000 subsidy and indirectly through the loss of taxes that would have been paid if this had been a private enterprise. Those who try to gloss over these figures argue that the Great Western Livestock Show is a public service, but it is equally true that the Chicago and Kansas City livestock shows are public services that pay taxes, receive no subsidies, and make a business profit.

I have given you only a few brief examples of what is going on in California to waste the taxpayers' money. I am doing all I can to get the State out of the foolish business of supporting fairs that could stand on their own feet if not subsidized. Furthermore, I believe that those fairs which cannot operate without subsidies should go out of business.

THE RUMOR that I am going to run for Supervisor of Los Angeles County is false. I shall run for re-election as Member of the Assembly, 46th District, in 1960.

Consistently, I have voted "No" on all bills to levy new taxes or raise existing taxes. It is my belief that the State of California, like any private citizen, should live within its income. As long as the Legislature continues to raise existing taxes or levy new taxes, there is no incentive for our State government to practice economy.

SEND ALL mail to me at Assembly Chambers, State Capitol, Sacramento 14, Calif., until June 20. On or about that date, the Legislature adjourns. Thereafter, my address will be P. O. Box 777, Inglewood 5, Calif.

I prefer letters or postal cards. I do not trust telegrams because it is possible for people to send telegrams with unauthorized names signed to them.

Lesson-Sermon Topic Revealed

"God the Only Cause and Creator" will be the subject of the Lesson-Sermon on Sunday in all Churches of Christ, Scientist.

A Scriptural selection from Luke (6:7-10) relates this healing by Jesus, "The scribes and Pharisees watched him, whether he would heal on the sabbath day; that they might find an accusation against him. But he knew their thoughts, and said to the man which had the withered hand, Rise up, and stand forth in the midst. And he arose and stood forth."

Then said Jesus unto them, I will ask you one thing: Is it lawful on the sabbath days to do good, or to do evil? to save life, or to destroy it? And looking round about upon them, he said unto the man, Stretch forth thy hand. And he did so; and his hand was restored whole as the other."

'Potpourri' Delivered To Tartars

Potpourri, literary magazine was distributed to students of Torrance High School on Tuesday. The present issue is the third of the annual spring publication. Costs of underwriting the publication are borne by the school's student council.

This year's 24-page edition is four pages larger than the one printed in 1958. Forty-six poems, short stories, and articles appear in the present issue and represent the best of writings submitted by students in the four high school grades.

The line and half tone design on the cover was done by Tom Hubbert, sophomore, and was selected in competition conducted in the art classes. Students in the typewriting classes prepared copy for the printers.

The project seeks to promote interest and expression in the language arts area and to offer recognition for student achievement in the area.
